

## AIR CONDITIONER TREATMENT

Wynn's® Air Conditioner Treatment eliminates the musty odors that can be created by fungus, mold and mildew buildup. With an easy-to-use aerosol application that requires no additional equipment, the product is sprayed directly into air vent inlets that are generally located under the windshield. The sanitizing product leaves a fresh, clean aroma in the vehicle.

Wynn's® Air Conditioner Treatment may be used in conjunction with Wynn's® AircoMatic™ Ultrasonic HVAC III Cleaning System (#03003) and AircoMatic™ Liquid (#30208) or with Wynn's® AircoFresh™ (#16201) aerosol treatment. Multiple product kits provide a more effective odor solution.
