

POWER STEERING

POWER STEERING SUPPLEMENT

Wynn's® Power Steering Supplement is a professional product formulated to enhance the capability of your power steering fluid. A power steering system encounters high pressures and temperatures which can cause power steering fluid performance to deteriorate. This exceptional product contains a viscosity modifier that increases the viscosity of the power steering fluid, while reducing squeaks that can often occur. Wynn's® Power Steering Supplement extends your power steering fluid longevity, revitalizes seals and O-rings and prevents seal leaks.

FEATURES AND BENEFITS:

- ✓ Stops and Prevents Seal Leaks
- ✓ Extends Power Steering Fluid Life
- ✓ Revitalizes Seals and O-Rings
- ✓ Helps Quiet Noisy Power Steering Pumps

SPECIFICATIONS:

Product No: ZW64805

Net Weight: 4.0 FL OZ (118 mL)

Case Quantity: 24 Each

POWER STEERING

POWER STEERING SUPPLEMENT

THE PROBLEM:

- Power steering fluid with low viscosity may squeak and squeal in use.
- Components made of rubber and other elastomers may shrink and become brittle over time, leading to fluid leakage.

THE SOLUTION:

- Wynn's® Power Steering Supplement contains a viscosity modifier to increase the viscosity of the power steering fluid and decrease noise.
- The seal conditioning agent in Wynn's® Power Steering Supplement helps soften and protect these components, preventing leaks.

Application and Treat Rate: One bottle treats one vehicle.

Directions: Add contents to the power steering pump reservoir. Do not overfill.

Limitations: Not recommended for systems requiring specialty fluids.
