## SYNTHETIC TRANSFER CASE / MANUAL TRANSMISSION FLUID

Protect Gears Under Load in Transfer Case and Manual Systems.

Wynn's® Synthetic Transfer Case/Manual Transmission Fluid has been reformulated to expand application for manual transmissions and transfer cases. The new formula performs well on synchronizers of all key material types – brass, carbon, sintered bronze and molybdenum – and offers excellent bearing and gear protection.

Wynn's® Synthetic Transfer Case/ Manual Transmission Fluid is suitable for most transfer case and manual transmission applications.

### FEATURES AND BENEFITS:

- ✓ Formulated for use in all transfer case and manual transmission applications specifying ATF or GL-1 Through GL-4 gear oils.
- ✓ Fully synthetic formula with high oxidation stability and excellent cleanliness
- ✓ Protects gears and bearings from wear
- ✓ Maintains fluidity and stability at low temperatures
- ✓ Provides excellent synchronizer performance in manual transmissions
- ✓ Compatible with yellow metals such as bronze, brass and copper that are often used in manual transmission components
- ✓ Compatible with elastomer materials used in manual transmissions

### SPECIFICATIONS:

Product No: ZW66303

Weight: Net 2 QTS (1.89 L)

Case Quantity: 6 Each

### SCAN FOR APPLICATIONS:
